

# **P4100 Fuel Gas Control Valve**

The BelGAS<sup>CP</sup> P4100 series is a pneumatically operated control valve, designed to withstand severely corrosive mediums associated with the oil and gas industry.

## **Applications**

- Low Pressure Separators/Compression Scrubbers
- Line Heaters
- Control Valve for Burner Systems

#### **Features**

- Simple Maintenance: The valve trim can be quickly changed without removing the valve from the line. Simply loosen the bolts to lift the bonnet and housing free of the body.
- Body Pressure Monitoring Tap Options: Multiple monitoring tap options are available. Choose the orientation that fits your application. Choose between untapped, output side tapped, supply and output side tapped, or the standard option, supply side only tapped. See figure 3.
- Signal (Pilot) Port Orientation Option: The P4100 also includes additional signal pilot customization for your application needs. Choose the standard option or any one of three additional options. See figure 3 to decide the orientation needed.

### **Specifications**

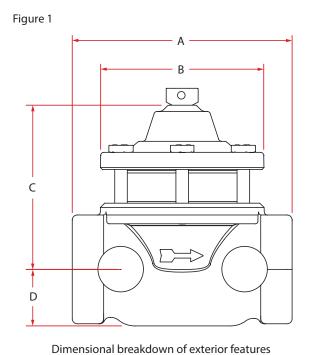

Inlet Pressure Rating	300 PSIG (Max)				
Temperature Range	-20° to 200°F (-29° to 93°C)				
Air Pressure to Signal (Pilot)	0-30 PSIG Recommended				

#### **Materials of Construction**

Part	Material	
Body	Cast Ductile Iron	
Diaphragm	Nitrile	
Gaskets	Tealon TF	
Housing	Cast Ductile Iron	
Main Spring	Stainless Steel	
Seat	Polyurethane	
Stem	Stainless Steel	
Trim / Orifice	Stainless Steel	

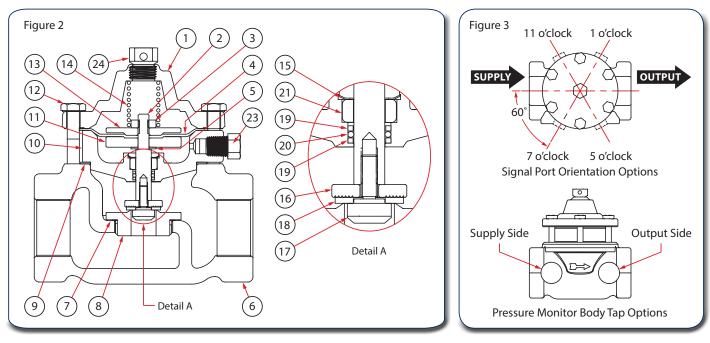

## **Dimensional Data (in.)**
